

STATEMENT ON A NONPROPRIETARY NAME ADOPTED BY THE USAN COUNCIL

USAN (FG-189) ROVALEUCEL

PRONUNCIATION roe" va loo' sel

THERAPEUTIC CLAIM Antineoplastic

SUBSTANCE DESCRIPTION

Autologous EBV-Specific Lymphocytes (EBVST)

The product is in the form of *in vitro* cultured live human lymphocyte cells cryopreserved in dimethyl sulfoxide (DMSO)-containing freezing media that, upon final preparation, appear as cell suspension. The phenotype will show >70% viability and 55% CD3-positive by flow cytometry analysis. The source of the cells are peripheral mononuclear cells isolated from patients' venous blood.
